Aditya Kumar Yadav

Aspiring Software Development Engineer (SDE)

Email: your.email@example.com | GitHub: github.com/yourusername | LinkedIn: linkedin.com/in/yourusername

Summary

Second-year computer science student focused on becoming a top-tier Software Development Engineer. Strong foundation in data structures, algorithms, and system fundamentals with practical experience in Python, C++, Java, and full■stack web development. Interested in building scalable systems and cloud-native applications.

Technical Skills

Languages	C++, Python, Java, JavaScript/TypeScript, SQL
Core CS	Data Structures & Algorithms, Operating Systems basics, Computer Architecture
Systems	Pipelining, Memory Organization, Instruction Set Architectures (ISA), Cloud Native Comp
Frameworks	React, Node.js, Spring Boot
Tools	Git, Docker, VS Code
Other	STL, Problem Solving, Competitive Programming

Projects

- Chess Web Application – Full■stack web application using Node.js and JavaScript allowing users to play chess online with move validation and game state handling.
- British Airways Review Analysis – Data analysis project using Python for sentiment analysis and topic modeling of airline reviews; built visualizations and insights for presentation.
- Customer Booking Prediction – Machine learning project involving feature engineering and RandomForest modeling to predict booking behavior with cross■validation evaluation.

Education

Bachelor's Degree in Computer Science (Expected) – Currently in 2nd Year
Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Databases

Achievements & Development

- Actively solving Data Structures and Algorithms problems on platforms like LeetCode and Codeforces.
- Strong understanding of C++ STL including vectors, maps, sets, stacks, queues, and priority queues.
- Focused roadmap toward top-tier software engineering roles with emphasis on scalable systems and problem solving.
